SKILLS

HTML, CSS, Javascript, Express, SQL, Postgres, EJS, Phaser, REACT, React-Native, Firebase, Mongoose, NoSQL, MongoDB, Python, Gatsby, Typescript, next.js, node.js, sequelize

RELEVANT EXPERIENCE

Microsoft, Bellevue — *Compression Engineer & Archivist*

April 2011 - May 2015

Trained new hires on archives operation, and was a point of contact between the team and management. Archived and retrieved digital master media sources as well as capturing new sources from analog tape and film.

Lululemon Athletica, Sumner — *Associate*

September 2017 - March 2020

Responsible for auditing checked out equipment and locking up the building. Handled mail and created monthly and yearly reports concerning each department's end of day reporting.

EDUCATION

General Assembly, Seattle — Full-Stack Web Development Grad

March 2020 - June 2020

An intensive, twelve-week, 450+ hour software engineering immersive program teaching full-stack application development with object-oriented programming, MVC frameworks, and SQL and NoSQL database programs.

PROJECTS

Neighborhood Farmstand — May 2020 — Express *Webapp*

A website to trade locally grown veggies and produce. Search by postal code, neighborhood, or food type. Built in express and ejs.

Plan-Ahead — May 2020 — *Typescript & React Webapp*

A resource for teachers and students to schedule class related homework. Built in Typescript, React, MaterialUI, and Mongo.

Donut Dunker — June 2020 — *iOS Mobile App*

A mobile game where you score points by tapping the screen to dunk a donut. Buy more donuts in the shop tab. Built in React-Native and powered by Firebase.
